

Ink Cartridges

Your Guide for Safe Disposal and Recycling in Calumet County

Why you should recycle ink cartridges

Over 350 million ink cartridges get thrown out and put into landfills every year. The benefits of recycling ink cartridges include:

- Prevent waste
- Save valuable resources
- Lower cost

Even though ink cartridges are very small there are a lot of materials that can be recycled.

Recycling options:

- Get your cartridges refilled at an office supply store
- Get a ink cartridge refill kit and refill the ink yourself

Many types of cartridges can be refilled more than once before they should be recycled. Some cartridge types can not be refilled.
