

WHO WE ARE

Calumet County Ag Stewardship Alliance is a nonprofit group of innovative farmers, committed community members and other professional partners dedicated to **our mission of championing sustainable farming practices that protect and improve water quality and soil health.**

Calumet County Ag
Stewardship Alliance

WHAT WE DO

- Through baseline testing of ground water, we measure progress in protecting and improving drinking water for our neighbors and our families.
- We hold field days to empower other farmers to try innovative farming practices that will result in continuous improvement in environmental stewardship.
- We work to bridge the gap in understanding between farmers and other residents through community outreach, social media and news media.

WHY WE DO IT

We love our community, respect our neighbors and value our agricultural way of life. Our commitment to the environment will help ensure that these are strong now and for future generations. The goals are shared by all of us, together.
